

ASSA CLIQ® Remote Mobile Programming Device

Application:

The Mobile programming device is a portable and personal programming device that is an optimal choice for a keyholder when an ASSA CLIQ® Remote key needs to be updated in various locations.

It acts the same way as the WallPD regarding key update, but gets power from AAA-batteries and a connection to the Internet via a mobile phone (Bluetooth) or laptop (USB).

Specification:

To be used with the ASSA CLIQ® Remote system.

Finish:

N/A

Standards:

N/A
