# SMARTair

## Your out-of-the-box digital Solution

The ASSA ABLOY SMARTair access control system offers a convenient and secure solution for managing access to your building.

A SMARTair solution is built around three main elements:

- 1. Wire-free locking devices to secure doors and other openings
- 2. Mobile phone-based and/or hard RFID credentials are issued to users - no more keys
- 3. Intuitive software manages everything without hassle.

You decide (and monitor) who goes where and when

### SMARTair System Architecture

Choose which system is right for you

SMARTair Update on Card

- Encode user cards directly for convenient access management.
- Intuitive SMARTair software simplifies the process.
- Add and delete users or lost/stolen cards.
- Collect audit trails for any lock or user.
- Add updaters or TCP IP encoders for a security upgrade.
- Users revalidate credentials via a network of updaters or TCP IP Encoders.
- Admin software collects and updates events automatically and regularly when Updaters and TCP IP Encoders are used.

SMARTair Pro Wireless

- Provides maximum system capability for large, busy buildings with many doors and users.
- Suitable for any size premises requiring real-time access control.
- Automated and encrypted communications between wireless devices and system software via communication hubs.
- Each hub manages up to 30 doors within a 30-metre range.
- Update or deny access rights wirelessly.
- Generate real-time audit trails for any lock in the organization.
- Open doors remotely.

SMARTair Openow

- Add-on to Update on Card or Pro Wireless Online system.
- Use the SMARTair Openow app to unlock any SMARTair device with a smartphone.
- Facility managers can send, revoke, and update virtual keys over the air from anywhere.
- Update the user's access plan and collect door history.
- Trigger email alerts using the user's app.
- Replace smart cards, tags, keys, and other physical credentials.
- Retain all other system functionalities.

Pricing your SMARTair System

1. Determine System size and Management Kit  
Identify the number of doors: This will determine the core size of your system.  
Choose your management kit – up to 10, 30, 75 or Unlimited doors
2. Do you require an update on card system or a Pro Wireless system  
☐ Update on Card                      ☐ Pro Wireless
3. Do you require Openow Mobile Credentials  
☐ Yes - select the correct Openow add-on – Same Number of doors as management kit                      ☐ No
4. Assess additional system requirements
  - Do you require Wireless Hubs for a Pro Wireless system
  - Any additional programming equipment
  - Credentials
5. Select your hardware

SMARTair Management Kits\*

SMARTair management kits includes Software Licence, PC to lock cable, Card Reader/ Encoder, Connection Cables & 50 x Mifare 1K Cards

| Management kits     |                                               |           |
|---------------------|-----------------------------------------------|-----------|
| Part Number         | Description                                   | GBP       |
| AC-S-STSPKIPWIR10MF | WIR Management Kit + I-PROG 10 Door MF        | £1,130.09 |
| AC-S-STSPKIPWIR30MF | WIR Management Kit + I-PROG 30 Door MF        | £1,515.54 |
| AC-S-STSPKIPWIR75MF | WIR Management Kit + I-PROG 75 Door MF        | £2,291.99 |
| AC-S-STSPKIPWIRUNMF | WIR Management Kit + I-PROG Unlimited Door MF | £2,291.99 |

SMARTair Management Kits with Openow add on\*

SMARTair management kits includes Software Licence, PC to lock cable, Card Reader/ Encoder, Connection Cables & 50 x Mifare 1K Cards

| Management Kits with Openow |                                                        | Openow    |
|-----------------------------|--------------------------------------------------------|-----------|
| Part Number                 | Description                                            | GBP       |
| AC-S-STSPKIPWIR10MFD        | WIR Management Kit + I-PROG + Openow 10 Door MF        | £1,289.23 |
| AC-S-STSPKIPWIR30MFD        | WIR Management Kit + I-PROG + Openow 30 Door MF        | £1,992.95 |

| AC-S-PPCABLEBIF    | PP Connection Cables. BIFI(JACK+PINES)  | £41.22    |
| AC-S-SNACKITEME    | Emergency Opening Tool - Battery Pack   | £63.38    |
| AC-S-SNZWIRTESTER  | Pro Wireless RF Testing Kit             | £1,148.46 |

SMARTair Update on Card

Optional for an Update on Card system

| I-Wall updater      |                            |         |
|---------------------|----------------------------|---------|
| Part Number         | Description                | GBP     |
| AC-S-SNWALLUPDATER1 | SMARTAIR I-WALL UPDATER V1 | £866.01 |

The i-wall updater is the innovative mini updater of the SMARTair Update on Card system. Its modern and sleek design integrates perfectly with the rest of the SMARTair product range. This device is designed to be wall-mounted and connects to the server via a LAN network, serving as the central point for updating and revalidating the RFID credentials of users in the facility.

SMARTair Pro Wireless

Required for a Pro Wireless system

| SMARTair Pro Wireless Hubs |                                |         |
|----------------------------|--------------------------------|---------|
| Part Number                | Description                    | GBP     |
| AC-S-STWIRELESSHUB6        | Pro Wireless Communication Hub | £367.58 |

Communication hubs link the management software server and Pro Wireless Online devices, enabling features like automatic access plan modifications and real-time audit trails. They offer remote control and real-time alerts.

The hub can be powered by 12/24 DC power and an ethernet cable or powered by PoE. Each hub can manage up to 30 access points within a 30m range, enhancing cost-effectiveness.

SMARTair Credentials

| Credentials  |                      |       |
|--------------|----------------------|-------|
| Part Number  | Description          | GBP   |
| SA-MFCARD-1K | Mifare Card White 1k | £2.88 |
| AB-MFTAG-1K  | Mifare Fob 1k Blue   | £6.22 |

\*Please Note - SMARTair i-max R4N and i-readers R4N part codes are compatible with DESFIRE Technology (EV1, EV2 and EV3). R4 hardware part codes would need to be modified to be compatible. Please speak with your sales manager.

## SMARTair i-reader

Elevate your security with the state-of-the-art SMARTair *i-reader*. Embrace innovation and unparalleled performance. With refreshed aesthetics and a robust design, the SMARTair

*i-reader* introduces fast, secure digital access management you can rely on. This upgrade enhances daily performance and convenience for both you and your building users.

### Modern, robust design

- Modern and practical: clean lines, glossy finish, top-mounted LED for enhanced visibility. Complement your space by integrating it seamlessly with other SMARTair devices for a unified look which blends in everywhere
- Robust: with IP56, the *i-reader* can be installed outside. With IK09, the standard *i-reader* is shock resistant
- Adaptable: whether you require installation in a narrow profile (*i-reader* Design model), electrical boxes, or rim-mounted (Standard *i-reader*), the *i-reader* offers the ideal option for your site

### High Performance

- Smooth user experience: credential reading (both RFID and mobile) is fast and at a convenient distance, enhancing user experience
- Parking mode: barriers and gates open when a valid Openow credential is used up to 5 metres away — simpler and safer for drivers
- Relay board: enables precise electrical control of the locking mechanism. It's physically separated from the reader with encrypted communication between them. It includes one output relay and inputs for door sensor and request to exit

### Convenient

- Customizable LED lighting and sound volume to meet different customers' needs

### Secure

- Secure, encrypted communication between wall reader and relay board
- Firmware upgradeable in response to new threats
- Enhanced RFID encryption

### Future-proofed

- Smart compatibility: works with new or existing SMARTair systems; reads cards, fobs, bracelets, badges and smartphones
- All in one: compatible with all management systems (Offline, Update On card, Wireless Online). It includes BLE so you can upgrade to mobile access at any time without extra hardware

## SMARTair Cylinders

Simple to install, converting any door into an access control point just by replacing its existing mechanical cylinder.

The EURO profile knob cylinder offers options like double electronic-electronic, double electronic-mechanic, double electronic-button and single cylinder to ensure 100% compatibility with market needs. Also available in Scandinavian, Finnish, ANSI and Australian profiles.

SMARTair Knob Cylinders have been analysed in terms of Durability EN 15684 Class 6 certificate.

RFID reader with LED (blue/red) for different warning signals.

Tailored to every type of door or access point (wooden doors, aluminium-profile doors, glass doors).

Exterior usage category: IP56.

Wireless and battery-powered knob cylinder (60.000 cycles).

Modern, elegant design with a choice of finishes to fit any building style.

Additional 5mm Increments to cylinder length\*

| Part Number | Description                          | GBP     |
|-------------|--------------------------------------|---------|
| 5mm length  | Additional of 5mm to cylinder length | +£10.93 |

Please note:

If you require a 50 50 external cylinder with UOC BLE. The part code and price will be calculated as below:

AC-S- SNBB12X035E35MI - Part code used from above

AC-S -SNBB12X050E50MI - Numbers changed to reflect 50mm External side 50mm internal side

6 X 5mm Increments - 6 X £10.00 = £60.00

SNBB12X050E50MI = £515.70 + £60.00

AC-S-SNBB12X050E50MI = £575.70

\* Parts created with 5mm increments will have an additional lead time

# SMARTair i-gate

Update on Card i-gate padlock 29

Pro Wireless BLE i-gate padlock

Easy, drilling-free installation and maintenance. Quickly swap any existing padlock with the easy to install, battery powered (60.000 cycles) i-gate padlock.

IP rating of 68: dust and liquid resistance. Its stainless steel shackle makes it more resistant to attack. The external black cover is completely watertight and protects against any weather.

Managed by any of the SMARTair systems, the new SMARTair i-gate padlock can be integrated, controlled and monitored, in real time, from the TS1000 softwares.

Compatible with all forms of intelligence The SMARTair i-gate padlock offers a new way to open up — using a smartphone and the Openow mobile app as well as RFID credentials.

The internal knob cylinder is certified on Durability EN15684 Class 6.

RFID reader with LED (blue/red) for different warning signals.
